Downhole Pressure Transmitter

EST POTROPONIA

- NACE certified materials
- Silicon-on-sapphire sensor technology for outstanding stability
- High temperature up to 200°C
- High pressures up to 2000 bar
- All-welded and sealed construction for use in harsh and corrosive environments

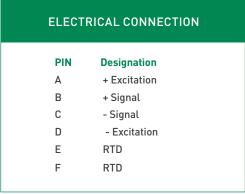

Description

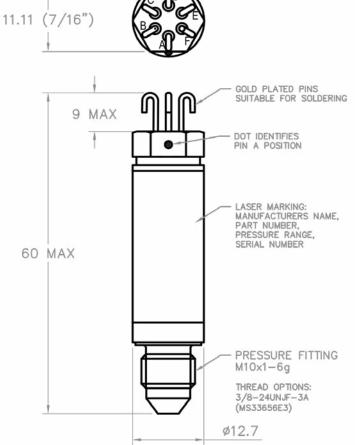

The HI5000 transmitter, for downhole applications, is highly compact with a maximum length of 58mm.

The tough, corrosion-resistant design, using NACE certified materials, makes installation easy in challenging environments. The sensor is designed to withstand high shock and vibration inputs in high temperature applications which require accuracy, stability and long term performance of downhole pressure monitoring.
