

## HISPEC© HI2000

**High Precision Pressure Transmitter** 

- Silicon-on-Sapphire sensor technology for outstanding performance
- Pressure ranges to 1500 bar
- High accuracy performance
- Titanium wetted parts for excellent chemical compatibility
- High thermal stability over wide operating temperature
- ATEX/IECEx option available (includes M1 for mining applications)

The advanced sensor design consists of a piezoresistive silicon strain gauge circuit, which is epitaxially grown onto the surface of a sapphire diaphragm to form a single crystalline structure. The sapphire sensor element is then molecularly bonded to a titanium alloy sub-diaphragm.

This enables the sensor to endure higher over-pressures and provides superb corrosion resistance. The sensor exhibits virtually no hysteresis and excellent long-term stability

#### **Specifications**

**The HISPEC HI2000** series of high precision pressure transmitters with state-of-the-art SOS sensor technology offers an operating range up to 1500 bar at an accuracy rate of  $< \pm 0.1\%$  of span - a level that was previously unobtainable or prohibitively expensive. ATEX and IECEx approval and protection by intrinsic safety is optional and intended for installation and operation in zone 0, gas group IIC, temperature class T4 and zone 20 dust and M1 mining.

#### Typical applications include:

- Laboratory and Test
- Aerospace
- Oil and Gas monitoring (downhole)
